about us

Baaz is a tech startup founded in 2018 with the vision to transform businesses across the world with superior digital experiences and solutions made with love in India and for the world.

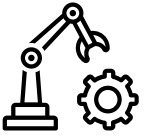

We're a \$10 million annual recurring revenue business and since the inception we have served more than 14,000 brands and 20 Million+ consumers from across India, middle east & US impacting shopping, banking, insurance, manufacturing, real estate and healthcare sectors.

We're backed by eminent venture capitalists from US, middle east and India as investors and have a solid team of software developers with wide ranging in-depth experience of building scalable and robust software products.

Founders bring an experience of building useful tech products, bringing them to market and scale the technology infrastructure to serve millions of users.

Our team has deep expertise in machine learning, artificial intelligence, computer vision, augmented reality and video compression to shape a superior outcome for our customers.

our case studies

Global Manufacturing Giant reduced operational costs by \$15M annually implemented intelligent supply chain optimization using predictive analytics and automated decision-making systems.

Leading Financial Services Firm improved fraud detection by 85% Developed real-time ML models that process 50M+ transactions daily with sub-second response times.

Major Healthcare Network enhanced patient outcomes by 30% with our AI-powered diagnostic assistance tools that support clinical decision-making across 200+ hospitals.
